

Advanced Referral System

What is ARS?

The Advanced Referral System (ARS) is an add-on feature available to PBIS Rewards users. This feature allows schools to log, track, and analyze their minor and major discipline referrals through the PBIS Rewards web portal and Staff App. Schools can customize multiple options inside ARS to best fit the needs of the school and its students. Schools can also print out paper copies of both major and minor referrals, including a parent signature line, for any reason.

MINOR REFERRALS

Staff can enter Minor Referrals into ARS for tracking purposes. Furthermore, admin can enable an option to have an email notification sent to all Referral Admins once a student has received a set number of Minor Referrals.

Based on the school's discipline policy, staff can also choose multiple Minor Referrals and convert them into a Major Referral to submit to the office.

The screenshot shows the 'Minor Form' interface in the PBIS Rewards app. The form includes fields for Student Name (Chris SANTIAGO (8 - M)), Student Code (550), Date (07/07/2022), Time (hh:mm am), Staff, Homeroom Teacher, and School Locations. Below these fields are three columns of checkboxes: 'Minor Problem Behaviors' (Primary Issue dropdown, Secondary Issues optional: Disruptive behavior, Dress code, Excessive talking), 'Redirections' (Take a Break, Proximity Control, Student Conference, Counselor Visit, Parent Phone Call, Move Seat), and 'Possible Motivations' (Obtain Peer Attention, Obtain Adult Attention, Obtain Item or Activity, Avoid Peer Attention, Avoid Adult Attention, Avoid Task or Activity).

MAJOR REFERRALS

Recording a Major Referral is similar to recording a Minor. However, Major Referrals are a two-part process. The initial action is taken by the staff member recording the referral. Once the staff member completes the major referral and selects Submit to Office, the referral is sent to admin and admin are notified.

The second part is completed by the Referral Admin, when they speak with the student and assign one or more consequences. Referral Admin can input details of their actions, including private notes only visible to Referral Admin, and submit it as completed.

Referrals can also be printed and edited.

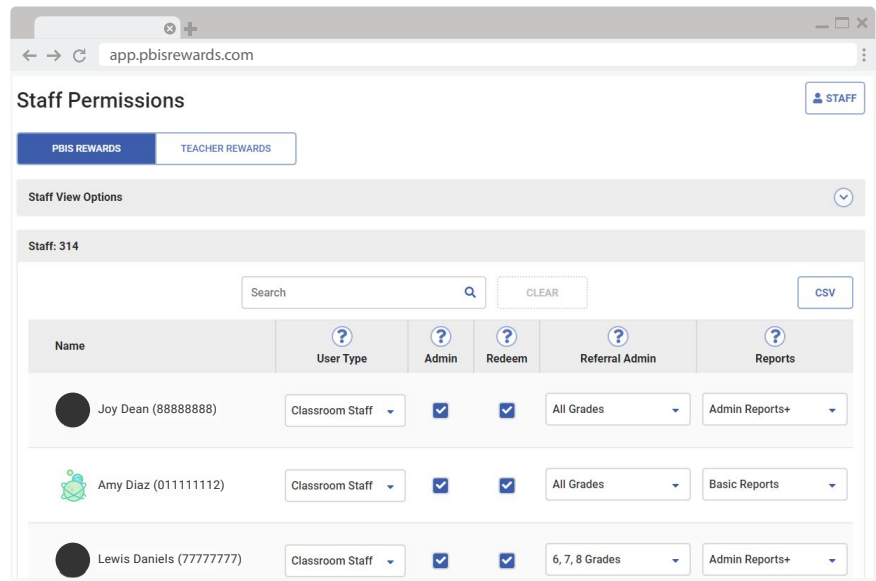

The screenshot shows the 'Give Major' form in the PBIS Rewards app. It displays student information: First Name: Lew, Last Name: EVANS, Student ID: 311, Grade - Gender: 8 - M. Below this, it shows 'My Referrals: 0 Total Referrals: 0'. The form includes fields for Date (07/07/2022), Time (hh:mm am), Reason (dropdown), Staff, and a checkbox for 'Email Referral Admin'. There are 'CANCEL' and 'RECORD' buttons at the bottom.

Advanced Referral System

PERMISSIONS AND ROLES

Permissions can be set for each staff member based on their needs and job description. These options are found under the Staff tab and by clicking the Permissions icon next to the staff member. Referral Admin can edit and/or complete office referrals.

They also receive emails regarding referrals. Referral Admin can select which grade levels they would like to receive referral emails from or select All Grades. From Referral View, the Referral Admin can see and print office referrals on the referrals page.

ARS/REFERRALS

ARS/Referrals can be found under the Settings tab. For each option, you are able to select whether the option is "active," the title of the section (i.e. Consequences rather than Administrative Action/Response), and the order in which they appear.

The following options can be customized within ARS:

- ◆ Locations (and the order in which they appear)
- ◆ Problem Behaviors
 - The descriptions "Repeated Minor Referrals" and "Other" will automatically be added.*
- ◆ Redirections
- ◆ Possible Motivations
- ◆ Administrative Action/Response
- ◆ Minor Problem Behaviors

In this section, you may also choose to rename the default "Major" and "Minor" Referral terms, choose the number of Minor Referrals at which an admin is notified (or disable this feature), and select who is able to see Minor Referrals. You can also select archiving and deleting options for Minor Referrals.
