

Star Rewards (Admin)

INCREASING STAFF BUY-IN WITH STAR REWARDS:

Each day, staff will see a star indicator on the staff web portal and on the app for positive actions that they have taken in the system. Staff will see one star once they have logged in that day. Two stars will show if they have awarded a point to a student that day. Three stars will be shown once they have reached their daily point goal. Untracked staff will see the third star if they have rewarded students from a group.

STARS AWARDED TO STAFF REPORT:

The Stars Awarded to Staff report allows admin to see the total number of stars that staff has been awarded during a given time frame as well as the average number of stars that were awarded per day. The graph in the report will show the top ten entries in the data table based on how it has been sorted. Admin can use this report to see who has not been logging into the system or to acknowledge the staff members that have the highest number of stars.

How to find it in the platform

Login > Reports > Point Reports

HOW TO SET A STAR SCORE:

Staff can automatically receive points in Teacher Rewards for earning Staff Stars (logging in, rewarding a student points, or reaching the Daily Point Goal). From the settings page under the options tab, an admin can turn on this feature and determine the point values for each star.

How to find it in the platform

Login > Settings > Options > Star Rewards: Set Star Score
