WORKSHEET

Daily Point Goals

Daily Point Goals, or DPG, are *not* set in stone! You can use and change this feature as needed to help increase buy-in from your staff and students. Check out our suggestions below to help set your DPG and understand how this also sets your school's economy.

SETTING YOUR ECONOMY BASED ON DPG

The following are suggestions for redeeming "prices" based on DPG. These can be shifted based on a standard supply/demand structure. It's important to think of these prices as percentages of what you are setting as a goal for both your staff and students.

Need to get Staff Motivated?

If you are finding that your Staff are having a difficult time with DPG and/or buying into PBIS, start off with a lower goal, and gradually increase it to a more ideal, fixed number for their DPG.

DAILY POINT GOAL

Use the table below to plan out your school's economy.

Classroom Staff: _____ Student: _____

Support Staff: _____

Item	Price

DAILY POINT GOAL CALCULATOR

The table below is a suggested way to calculate how many points to award to students given these example Daily Point Goals.

Classroom Staff: **60** Student: **12**

Support Staff: **30**

Item (Either from school store or student won)	Price (Percentage)	Price (Points based on example)
Pencil	25% of Student DPG	3 points
T-Shirt	200% of Student DPG	24 points
Quarterly Raffle Grand Prize	1 Entry for 50% of Student DPG	6 points
Entry to Monthly Schoolwide Event	500% of Student DPG	60 points
